Hi [REDACTED],

We have just added a great new update to our Opendisc private web-site.

As well as the **acoustic version of 'A Beautiful Lie'** just added to the Unreleased Tracks section, in the Video section, you can watch us perform **'The Kill', recorded live at Festivalbar** for Italian television.

To access this, just insert your CD **'A Beautiful Lie'** into your computer and click 'Enter' from within the Opendisc box.

But before you do that. Why not **vote for us at this years MTV European Music Awards?** We're nominated in two categories ('Rock Out' & 'Inter-Act') and you can **vote online by clicking here.**

Every vote counts!

More soon!
